

CHELSEA GROUP LIMITED

**Liz Dalton**  
**Biographical Sketch**  
**“The Future of Existing Buildings”**

Liz Dalton is a Building Scientist at Chelsea Group, Ltd., a leading firm in building science consulting. Ms. Dalton works with a team of engineers to provide architectural design and technical drafting for Chelsea Group’s consulting work. She has developed expertise in documenting existing conditions and uses CAD MEP to develop draft designs for projects. Her work provides an accurate underpinning for the mechanical design work of her team.

Ms. Dalton’s expansive knowledge of commercial interior design and construction management enables her to expertly support engineers in drafting the building design plan, specifically in regards to mechanical infrastructure in occupied spaces. Her experience with reflected ceiling drawings and the architectural details of interior spaces adds dimension to the mechanical work typical of her teammates. Her construction experience provides depth to constructability reviews.

Prior to joining Chelsea Group, Ms. Dalton collaborated on projects including Partners Healthcare, One Boston Place, and Yuma Municipal Government Center, providing oversight on commercial interior design, developing sustainable construction standards, conducting construction management, and handling relocation management. Ms. Dalton received her Bachelor of Science from Wentworth Institute of Technology in the discipline of interior design.
