

**Tom Miske**  
**Biographical Sketch**  
**“The Future of Existing Buildings”**

Tom Miske is a Building Scientist of Chelsea Group, Ltd., a leading firm in Building Science consulting. Mr. Miske works with a team of engineers to design and provide technical analysis of Chelsea Group’s consulting work. Mr. Miske’s primary focus involves commissioning, which includes functional testing, documentation, troubleshooting, and providing quality assurance.

Mr. Miske also works extensively with the Central Plant Energy Optimization (CPEO) program at Chelsea Group, using the big data

Prior to joining Chelsea Group, Mr. Miske was employed at Pearl Harbor Naval shipyard and IMF, where he worked as a control and testing engineer, overseeing the maintenance of nuclear submarines, coordinating and conducting tests, reporting, and acting as a liaison between the civilian and military workforce. Mr. Miske also served as a safety engineer, responsible for ensuring that systems work safely and tasked with striving to pinpoint and eliminate any potentially harmful facets from being present during operation.

Mr. Miske received his Bachelor of Science from University of Hawaii Manoa in the discipline of Mechanical Engineering.
