

CHELSEA GROUP LIMITED

**The Central Plant Energy Optimization user group meets for the second time this year at TOPA Financial Center**

Honolulu, HI — On June 22, 2017, Chelsea Group hosted its quarterly CPeO (Central Plant energy Optimization) Users Group event at TOPA Financial Center. TOPA is a standing member of the CPeO User Group.

Chelsea Group Building Scientist Wyeth Crawford gave an informative presentation on “Advancing Efficiency in Hawaii Buildings.” Building Scientist Dricka Thobois said “We were able to give them suggestions, and all the engineers were able to chime in and collaboratively talk through the situations and issues raised—together—which is really what the CPeO User Group is all about.”

Thobois is hopeful for the future possibilities of the group’s evolution: “The more engineers and building professionals we get as the group grows, and as each member becomes more comfortable joining in the discussions, it’s just going to get better and better.”
