

CHELSEA GROUP LIMITED

**Brent Cooper**  
**Biographical Sketch**  
**“The Future of Existing Buildings”**

Brent Cooper utilizes his more than twenty years of experience to assist with The Queen’s Medical Center supply air system upgrades, where he is hands-on in every design. Mr. Cooper’s advanced Revit drafting skills and building information modeling (BIM) expertise allow him to make quality designs for AHU System retrofits to ensure all building operations function in the most economical and energy-efficient manner.

As the official lead trainer for new design technology, Mr. Cooper’s work also often focuses on training the Chelsea Group design teams. Having been integral in introducing and advancing point cloud technology to Chelsea Group, Mr. Cooper continues to remain active in gathering information and training materials from national training organizations and integrating the knowledge gleaned into Chelsea Group training sessions. Mr. Cooper is also responsible for steering all company interns to proficiency in both CAD and Revit.

Prior to joining Chelsea Group, Mr. Cooper led projects at M. Watanabe Electrical Contractor, Moss Engineering, Inc., and Thermal Engineering Corp., assignments in which he collaborated with other disciplines as Project Manager, BIM Specialist and drafting and design. He has Autodesk certified training in AutoCAD, Revit & Revit Architecture from US CAD.

Mr. Cooper’s education and experience also includes electro/mechanical design and architectural design.
